

Table 3. Infant examination form (0-12 months)

Observations and vital signs																			
General observations <i>General appearance, movement pattern, skin, handedness</i>																			
Head, face, eyes, ears, nose <i>Marks, bruising, swelling, discharge, rash, mucous, asymmetry</i>																			
Cardiovascular and respiratory <i>Chest wall deformities, respiratory effort, color</i>																			
Abdomen <i>Distention, rigidity, umbilicus</i>																			
Social interaction <i>Child and parents, child and practitioner</i>																			
Measurements*	<table border="1"> <tr> <td>Weight:</td> <td>lb.</td> <td>kg</td> </tr> <tr> <td>Length:</td> <td>in</td> <td>cm</td> </tr> <tr> <td>Heart rate:</td> <td></td> <td>BPM</td> </tr> <tr> <td>Respiratory rate:</td> <td></td> <td>RPM</td> </tr> <tr> <td>Capillary refill:</td> <td></td> <td>secs</td> </tr> <tr> <td>Temperature:</td> <td>°F</td> <td>°C</td> </tr> </table>	Weight:	lb.	kg	Length:	in	cm	Heart rate:		BPM	Respiratory rate:		RPM	Capillary refill:		secs	Temperature:	°F	°C
Weight:	lb.	kg																	
Length:	in	cm																	
Heart rate:		BPM																	
Respiratory rate:		RPM																	
Capillary refill:		secs																	
Temperature:	°F	°C																	
Neurological examination																			
<i>When indicated, plus additional neurological examination as indicated (tone, co-ordination, posture, stance, gait, etc.)</i>																			
Cranial nerve screening	Normal/abnormal response																		
CN 2: Pupillary light reflex																			
CNs 3, 4, 6: extra-ocular movements																			
CN 5: facial sensation, masseter/temporalis motor																			
CN 7: blink response, facial expression																			
CN 8: hearing screen																			
CN 9, 10: speech swallow, gag																			
CN 11: active head rotation																			
CN 12: active tongue movement																			
Primitive Reflexes	Normal/abnormal response																		
Rooting reflex																			
Sucking reflex																			
Moro Reflex																			
Plantar grasp																			
Palmer grasp																			
Babinski																			
ATNR																			
Stepping reflex																			
Muscle stretch reflexes	Normal/abnormal response																		
Biceps																			
Brachioradialis																			
Triceps																			
Patella																			
Hamstring																			
Achilles																			
Orthopedic examination	Normal/abnormal findings																		
Hip examination if indicated <i>Issues with walking</i>																			
Observation and palpation for spinal and extremity deformity, e.g. scoliosis																			
Musculoskeletal examination																			
Palpation	Findings																		
Active and passive range of motion <i>Spine, extremities — as indicated</i>	Cervical: Thoracic: Lumbar: Pelvic: Upper extremity: Lower extremity:																		
Static and motion palpation for regional restriction, tenderness <i>Spine, extremities — as indicated</i>	Cervical: Thoracic: Lumbar: Pelvic: Upper extremity: Lower extremity:
